

VIET ENVIRONMENTAL LIMITED COMPANY

COMPANY PROFILE

Open letter

Dear CUSTOMERS AND PARTNERS!

Environmental protection is one of the urgent issues of global concern. The development of the environmental industry not only helps minimize the negative impact of humans on nature but also plays an important role in promoting sustainable development and moving towards a green future.

Viet Environmental Limited Company (referred to as **MTVi**), established on September 10, 2008 under Business License No. 5800586488 issued by the Department of Planning and Investment of Lam Dong province, was born with the mission of providing comprehensive solutions for environmental management - environmental technology. Founded by a team of experienced engineers and experts, we constantly research and innovate to provide high quality services to meet the increasing needs of the market.

With 17 years of experience, **MTVi** has become a reputable partner providing full environmental consulting for businesses in all fields (industry, agriculture, healthcare, tourism, education,...)

In parallel with service development, we have expanded the system in the largest city in the country - Ho Chi Minh Headquarters, in the Central Region - Central Highlands with branches in Dak Lak, Khanh Hoa and representative offices and plans to expand the market throughout the South, laying a solid foundation to bring environmental solutions closer to businesses and communities.

We are committed to providing optimal solutions, quality products, and professional services with the spirit of effective and sustainable cooperation. The trust of our customers is the driving force for us to constantly develop, innovate and improve competitiveness, aiming to become a leading unit in the environmental field in Vietnam.

We look forward to accompanying and cooperating with customers and partners on the journey to create a Green - Clean - Sustainable environment.

Best regards!

About us

Viet Environmental Limited Company has more than 17 years of experience, is a consulting and implementing unit of environmental - ESG solutions for Vietnamese businesses, FDI enterprises and large-scale industrial projects in Vietnam. Outstanding with the ability to understand Vietnamese environmental laws combined with operating according to international standards, helping businesses comply effectively and develop long-term sustainability

Owning a team of more than 50 experts, engineers, and environmental consultants, we are confident in our ability to meet all the needs of businesses across a wide range of production and business sectors. Our experts operate in various regions, enabling us to quickly implement multi-regional projects, respond promptly and flexibly to client requirements, and gain a deep understanding of the specific characteristics of different areas.

We provide comprehensive environmental solutions, from environmental legal consulting, design - construction - operation of wastewater treatment systems, solid waste treatment systems, to ESG consulting and sustainable development, helping businesses reduce legal risks, optimize costs and operate stably. MTVi positions itself as a strategic partner, standing side by side with businesses throughout the project life cycle in Vietnam.

*Partnering for Compliance,
Building Sustainability*

Vision - Mission

Vision

To become a leading environmental and sustainable development consulting partner in Ho Chi Minh City and the Southern Key Economic Region, trusted and chosen by Vietnamese enterprises and multinational corporations seeking effective compliance solutions, safe operations, and sustainable growth in Vietnam.

Mission

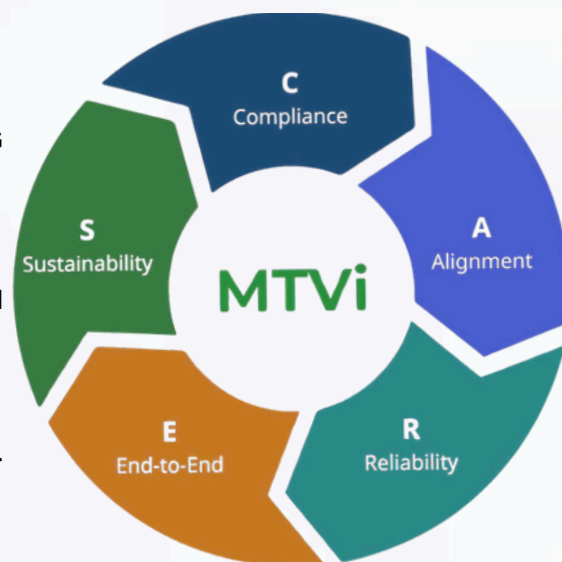

To deliver specialized, reliable, and internationally aligned environmental and ESG solutions that enable FDI enterprises to:

- Fully comply with Vietnam’s environmental regulations
- Minimize legal and operational risks
- Optimize treatment system performance and long-term cost efficiency
- Meet the increasingly stringent requirements of ESG standards and global supply chains

Core values

CARES – MTVi’s care about our clients’ sustainable development

- C – Compliance
Full and Accurate Compliance with Vietnamese Regulations
- A – Alignment
Aligned with International Standards and Global ESG Requirements
- R – Reliability
Being a trusted partner in consulting, implementation, and long-term collaboration
- E – End-to-End
End-to-End Solutions: Legal → Engineering → Operations → ESG
- S – Sustainability
Driving Long-Term Efficiency and Sustainable Growth

MTVi is committed to being a strategic partner, supporting businesses in achieving stable and sustainable growth throughout the entire project lifecycle

Difference value

Local Legal Expertise – International Standards

- Expert command of environmental laws, decrees, and circulars
- Operations aligned with International standards & ESG frameworks
- Tailored solutions for FDI enterprises

Comprehensive Solutions – A Single Partner

- Legal → Technical → Operations → ESG
- Risk mitigation & cost optimization
- Integrated project implementation

Long-term Strategic Partner

- 17+ years of experience
- Multi - Regional capability
- Lifecycle Project Partnership

MTVi partners with businesses from project development through stable operation and long-term sustainable development

Field of activities

1. Environmental Documentation & Regulatory Advisory

- Environmental Impact Assessment Reports (EIA)
- Environmental Permit Applications (EP)

Buong Village Project

Indigenous knowledge - Creating sustainability

This is a community initiative initiated and implemented by MTVi, aiming to preserve indigenous cultural values with products from the leaf of *Corypha lecomtei* in Khanh Hoa province, contributing to improving livelihoods through enhancing product value towards sustainable development in the locality.

Project goals

- Preserving and promoting the indigenous cultural value of the Buong leaf tree
- Linking livelihood development with environmental protection through a circular economy model
- Raise community awareness about sustainable development through a series of workshops

Value creation and impact

- Enhancing community awareness of indigenous cultural values associated with the *Corypha lecomtei*.
- Safeguarding indigenous resources, specifically the Buong leaf tree and its traditional craft villages.
- Establishing a framework for the growth of experiential tourism and the circular economy.
- Promoting ESG values and strengthening Corporate Social Responsibility (CSR).
